# BERGHOFF X7
# ELITE WARRANTY

## OUR WARRANTY

Your food processor comes with a 2 year warranty, while the titanium tipped blades have a 10 year warranty. It protects you from any manufacturers defects, but not from wear and tear or damage that occurs due to human error. All defective items will be repaired or replaced at our discretion and if it is no longer available, it will be replaced with an item that has a similar function and value. Please make sure that you activate your warranty within two weeks of purchase.

## WHAT IS NOT COVERED

When operating the X7 Elite, please ensure that you follow the instructions that are included with your purchase and the care guide.

The motor base of your X7 Elite is covered by your warranty terms, however, the jug, lid and tamper stick are not covered by this warranty. Your warranty only covers defective products caused by the manufacturer, it does not cover damage caused by wear and tear or the user.

Do not allow the motor unit, chord or plug to get wet. If you submerge the device in liquid of any kind, it will be deemed as misuse and will void your warranty. The jug, blades and lid may be placed into the dishwasher, but the motor unit itself must not be placed into the dishwasher as this will be deemed as misuse. Any damage that is caused to the chord or plug that is the result of a sharp implement will also be deemed as misuse and will not be covered by your warranty.

When processing food with colour, plastic elements and blades may become discoloured. This is deemed as general wear and tear and does not affect the performance of your blender, so will not be covered by your warranty.

Please note that your BergHOFF X7 ELITE will not work without the jug sitting on the base in the correct position. The jug has a small protruding plastic part underneath that must sit correctly into the cut-out switch on the motor part of the appliance.

The blender also has a thermal cut-out switch built into the motor so as to protect itself from overheating. Please refer to the Use & Care instructions supplied within the box for further information.
